GK

Please amend the paragraph starting at page 15, line ~~22~~<sup>23</sup> and ending at page 16, line 2, as follows:

--The parameters which can be set in the manual mode include a horizontal image angle size, a vertical image angle size, the number of pixels per frame, a frame rate (the number of frames/second), a compression rate of a luminance ~~brilliance~~ signal and a compression rate of a color signal. The respective parameters may be set in various manners by operating slide switches 705 to 710.--

Please amend the paragraph starting at page 17, line 17 and ending at page 18, line 2, as follows:

--When the sports mode or the portrait mode is set when the image data is to be transmitted together with the image pickup of the VTR built-in video camera, a charge storage time of the image pickup element 102 is set shorter than that in the standard mode
